# Sustainable Aquafeeds – Challenges & Opportunities

Whilst the aquaculture sector continues to grow and make an ever increasing contribution to world food supplies, there is a need to ensure that the sector continues to develop in a socially, economically and environmentally sustainable manner, in line with the United Nations sustainable development goals. The present webinar focuses on the major perceived sustainability issues related to feed inputs for finfish and crustacean aquaculture species, including sustainability issues related to feed formulation and ingredient selection, feed manufacture and feed quality, on-farm feed use and impacts, and fish quality and food safety.

### Panelist

**Marc Metian**

#### Dr Albert Tacon

- Global expert in aquaculture and aquaculture nutrition
- Since 1976, he has worked in 44 countries worldwide, and has more than 250 publications and one patent
- Founded Aquahana LLC, a consultancy service provider and has been actively engaged in promoting sustainable development of aquaculture and aquafeed industry
