Presidents' Award for Teachers Recipients

|	
PAT RECIPIENTS	

PAT 2021 Recipient:

Iman Tang (School of Informatics & IT)

"Unlocking the motivation to learn in each individual student is one of the most rewarding aspects of teaching."

"I want to help people find passion in what they do."

"I believe that every student can continuously improve themselves if given the right motivation. Every student has a unique profile."

PAT 2018 Recipient

Tan Lay Khee (School of Applied Science)

"It is impossible to teach everything, and students need to learn how to learn."

"To build students' capacity in lifelong learning, students need to be empowered to judge their own learning. Only when students know where their learning gaps are would they be able to expend effort to bridge that gap."

"To do so, I recognize I need to relinquish my power to some extent so that I can guide my students by their side."

PAT FINALISTS

PAT 2024 Finalist

Zhang Huiyu (School of Informatics & IT)

Huiyu is an innovative educator who is deeply passionate about using educational technology to enrich her students' learning experiences.

Her AI-enabled chatbots, used by fellow lecturers, offer learning analytics dashboard to understand students' learning preferences, engagement levels, knowledge gaps, and self-regulated learning behaviours.

PAT 2022 Finalist

Maisha Foo (School of Applied Science)

"Students, and even many of us, change our career roles through life.

If students realise that they could positively impact their immediate surroundings and people around them, I believe they will continue to be involved in such meaningful projects irrespective of their career choice."

PAT 2021 Finalist

Sowmya Sathish (School of Engineering)

"*Students, and even many of us, change our career roles through life. If students realise that they could positively impact their immediate surroundings and people around them, I believe they will continued to be involved in such meaningful projects irrespective of their career choice.*"

"*I see myself as a friend-mentor rather than their lecture.*"

"*I believe that students can work towards fulfilling their potential when their basic needs, like being esteemed for who they are, and being safe, are met.*"
